We do not have responsibility with content of this book.

The Gospel of Mark from the New Testament. An endless and wonderful resource for VBS, Bible Study, Sunday School, weekly bulletin, website, etc.

If you're looking for another way to engage people and encourage research into the Gospel of Mark, why not consider cryptograms?

Cryptograms is the result of encrypting something readable ("plain text") into something that doesn't appear to make any sense ("cipher" or "encrypted" text). This workbook uses the "Caesar Cipher" (also known as a "simple substitution cipher") to encrypt the verses from the Gospel of Mark. Workbook #1 keeps the verses in order; subsequent workbooks scramble the verse ordering.

Each verse is encrypted with its own "key" ... meaning that each new cryptogram presents a new challenge!

These cryptograms can be solved by young children who are capable of reading and writing in sentences. Teens and older should have very little trouble with the cryptograms.

Each workbook contains the cryptograms, a "hint" for each one, and then the associated plain language verse.

This workbook is one of several in my series of Gospel of Mark cryptograms. I have also published workbooks from other books of the Old and New Testaments. Please take a moment to look thru the books I've published.

These workbooks can add value to your worship resources, and can be used for years.

Thank you for taking the time to consider this workbook.
